WORK EXPERIENCE

Lambda Theta   **March 2022 - April 2023**
Junior MERN Stack Developer
- Led the integration of **APIs,** resulting in a **20%** reduction in data retrieval time.
- Bridged the database server (Python) with the application layer and **Node.js** server for the frontend.
- Implemented Route Optimization, and placed the markers on the **Google map** according to the timeline fetched from **MySQL**.
- Introduced an **Excel file** upload feature, leading to a **30%** increase in data accessibility and usability.

Freelance Platform (Upwork/Fiverr)   **January 2021 - Present**

Survey Management Website
- Developed and launched a Survey Management Website, enabling users to participate in over **100 surveys** and earn rewards.
- Integrated **Nodemailer** and **Twilio** to enhance user verification via **OTP** through both phone and email.
- Connected **Google Sheets** to the website, allowing for streamlined data management with over **500 CRUD operations** performed by users.

Printing Press Website
- Designed and executed a user-friendly and mobile responsive Printing Press Website, resulting in a 40% increase in quote requests for various products.
- Enhanced customer interaction by integrating a Content Management System (Contentful).
- Incorporated animations using the Animation-On-Scroll (AOS) Library, leading to a 25% increase in user engagement.
